

MOHAMMED SAHIS N P

+91 77367 79863 — sahisnp@gmail.com — LinkedIn — GitHub

Professional Summary

Data-driven **Computer Science** student specializing in **Data Analytics and Machine Learning** with hands-on experience in predictive modeling, dashboard development, and full-stack applications. Skilled in **Python, SQL, Power BI, XGBoost, and LightGBM**. Proven ability to extract insights from large datasets, automate workflows, and deliver impactful data-driven solutions through clear visualizations and analytical reporting.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Aug 2022 – Present

M.S. Ramaiah University of Applied Sciences, Bangalore, India

– GPA: 8.72/10

Pre-University Course (PUC) – Bio-Science

2020 – 2022

GHSS Anamangad, Kerala, India

– Percentage: 94.6%

Secondary School (10th Grade)

2019 – 2020

D.U.H.S.S Thootha, Kerala, India

– Percentage: 95%

Projects

Adaptive Honeypot System using ML and RL (Cybersecurity Project)

- Developed an **AI-driven adaptive honeypot** that dynamically modifies attack surfaces based on detected intrusion patterns.
- Implemented real-time **attack logging, behavioral analysis, and threat classification**.
- Applied **Machine Learning (ML)** for anomaly detection and **Reinforcement Learning (RL)** to adapt system responses against evolving threats.

Credit Card Fraud Detection (Machine Learning Project)

- Built models using **Logistic Regression, XGBoost, and LightGBM** achieving 94%+ accuracy.
- Preprocessed and analyzed **285K+ transactions** for fraud detection.
- Delivered insights through visual analytics and technical seminar presentation.

Insurance Analytics Dashboard (Power BI)

- Designed interactive **Power BI dashboard** with scheduled refresh and Row-Level Security.
- Integrated **Python-based sentiment analysis** for customer review insights.

Sales Analytics Dashboard (Power BI)

- Developed city-wise profitability tracking with interactive KPIs.
- Enabled decision-making using comparative data visualization techniques.

TravelCompare – Multi-Mode Travel Platform

- Developed responsive comparison tool for flights, trains, and buses.
- Deployed using **Vercel and Render** with dark-mode UI and animations.

Technical Skills

- | | |
|-------------------------------|----------------------------------|
| – Python, SQL | – MySQL, MS SQL Server |
| – Pandas, NumPy, scikit-learn | – Git, GitHub, VS Code |
| – XGBoost, LightGBM | – Jupyter Notebook, Google Colab |
| – Power BI, Excel | – Windows, Linux, MacOS |

Certifications

- IBM Data Science — Coursera (Ongoing)
- Data Analyst Course — Udemy
- Data Structures & Algorithms — Udemy
- Cybersecurity Analyst Job Simulation — Tata Group (Forage)
- Data Analysis Internship — Cognifyz Technologies
